PROFESSIONAL SUMMARY

Full Stack Developer with nearly 3 years of professional experience building and maintaining web applications in a production environment. Specialized in PHP, Laravel, and Zend Framework 1 on the backend, and jQuery with Bootstrap on the frontend, with hands-on experience delivering features for an enterprise RFID management platform used across 30+ countries. Also builds personal projects using React, Next.js, and Flutter.

EXPERIENCE

Full Stack Developer May 2023 – Present

USTEK RFID — Istanbul, Turkey | ustek-rfid.com

- Developed and maintained web application features for an RFID-based laundry management platform deployed in 30+ countries, serving commercial laundries, hotels, and healthcare facilities.
- Built and extended RESTful APIs and web interfaces using PHP, Laravel, Zend Framework 1, jQuery, and Bootstrap to support real-time RFID inventory tracking, automated billing, and logistics management modules.
- Implemented linen and garment lifecycle tracking features — including warehouse monitoring, uniform rental management, and scrub dispensing — that directly improved client operational efficiency.
- Collaborated with hardware integration teams to maintain reliable data flow between UHF RFID terminals, readers, and the web platform.
- Improved system stability by identifying and refactoring error-prone modules, reducing production incidents and ensuring the platform remained reliable for global clients.

PROJECTS

Invoice Management System 2025

PHP 8.2, MySQL, TCPDF, PHPMailer, Bootstrap

- Full-featured business invoicing application with PDF generation, email distribution, and payment status tracking (outstanding / paid / overdue).
- Implemented automatic tax and subtotal calculations, multi-item line support, and a responsive mobile-friendly UI.

Find Job with AI 2025

PHP, AI/LLM Integration

- Job search platform that uses AI to intelligently match candidates with relevant job opportunities.

Real Estate Platform (BestTrend-SY) July – October 2025

Laravel 10, React, TypeScript, Vite, Tailwind CSS (shadcn/ui)

- Full-stack real estate platform for the Syrian market: property listing and publishing, advanced search and filtering, favorites, saved searches, and analytics dashboards.
- Built a Laravel 10 REST API with Sanctum authentication and Bunny Storage CDN image hosting, and a React + TypeScript frontend with multi-language support (Arabic RTL, English, Kurdish).

Full-Featured POS System February – May 2024

Laravel, PostgreSQL, jQuery, AdminLTE

- Point-of-sale system for retail environments managing products, categories, users, and transactions via an AdminLTE dashboard.
